Assignment Questions

CT405-N: Object Oriented Programming Using Java

Link of Lecture Note:
https://github.com/hbpatel1976/Java/blob/main/Java-LectureNotes.pdf

1. OOP Vs. Procedural Programming [Slide #30]
2. What is bytecode? Justify why Java is platform independent. [Slide #32]
3. Java Features [Slide #35]
4. Operators in Java [Slide #46]
5. Java Control Statements [Slide #49]
6. Keywords: (a) `this` (b) `final` (c) `super` [Slide #61]
7. Types of Constructors [Slide #75-#79]
8. `String` class Vs. `StringBuffer` class [Slide #81]
9. Final Variables and Methods [Slide #85]
10. Access Modifiers [Slide #92-#93]
11. Inheritance [Slide #99-#105]
12. Polymorphism [Slide #107]
13. Method Overloading [Slide #108-#109]
14. Method Overriding [Slide #110]
15. Method Overloading Vs. Method Overriding [Slide #113]
16. Abstract methods and classes [Slide #114]
17. Abstract Vs. Interface [Slide #129]
18. Packages [Slide #139]
19. Exception Handling [Slide #149-#152]
20. Multithreading [Slide #155-#156]
21. Thread Lifecycle [Slide #160]
22. Thread Synchronization [Slide #170]
23. Binary I/O Vs. Text I/O [Slide #180]
24. Event and GUI programming [Slide #182-#183]
25. Applet Lifecycle [Slide #184]
26. Layout Manager [Slide #185-#186]
27. Application Vs. Applet [Slide #195]
